Mr. Robert W. Reid, Chief
Operating Reactors Branch #4
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Indian Point 3 Nuclear Power Plant
Proposed Security Plan
Docket No. 50-286

Dear Mr. Reid:

Pursuant to Parts 50.34(c) and 73.55, Title 10 Code of Federal Regulations, the attached five copies of the Proposed Interim and Final Security Plans for the Indian Point 3 Nuclear Power Plant are submitted. This submittal is in conjunction with the Power Authority of the State of New York and Consolidated Edison Company of New York's application for amendment to operating license (DPR-64) dated March 16, 1977, which would permit assumption of operation of the Indian Point 3 Nuclear Power Plant by the Authority. The enclosed Security Plans represent the program which would be implemented upon the authorization from the United States Nuclear Regulatory Commission permitting the Power Authority to assume operations at the Indian Point 3 Nuclear Power Plant.

This submittal contains two plans, a Interim Plan and a Final Plan. The former covers that period of time commencing with the assumption of responsibility by the Power Authority as the licensee for the Indian Point 3 Nuclear Power Plant, and the latter deals with the Authority's plan in accordance with Part 73.55, Title 10 Code of Federal Regulations.

This submittal is forwarded under separate cover from the aforementioned petition and is identified as proprietary information pursuant to Parts 2.790(d) and 9.5(a)(4), Title 10 Code of Federal Regulations. It is requested that upon receipt of this correspondence, you inventory the contents and return enclosure #2 to the Power Authority's Director of Security and Safety.

Very truly yours,

George T. Berry
