Attached are some examples of drawings related to WMA C pits and pipe trenches showing elevations/slopes, various drains/weep holes, wash-down spray nozzles, leak detectors, and other construction details.

Hopefully these samples will answer your questions and/or confirm information we have provided verbally.

Let me know if you have more specific questions.

Doug DeFord

Subject: RE: Action Items

Importance: High

Doug,

Regarding the three teleconference summaries, they have all been written but they are still in concurrence. We are looking to send them as soon as they are available, and hopefully next week.

That will be great if you send us the drawings.

Regards,

Robert Lee Gladney, MSME, PMP

Nuclear Regulatory Commission

Subject: [External_Sender] Action Items

Hi Lee,

We are still hoping to see meeting summaries for the follow-up calls we had in November.

In the meantime, was there an action item for us to send you some drawings for the pipeline encasement drains?

I have found some drawings that help with that.

Doug DeFord, PE
