Re: White Mesa Mill Reclamation Plan Revision 11
NUA 1158
Tracker No. 40-8681

Dear Mr. Stablen:

Enclosed are three copies of the White Mesa Mill Reclamation Plan Revision 11. The update of the Reclamation Plan has been revised to incorporate changes and additions developed through formal NRC questions and responses. As a result of the meeting we held in March of this year to further clarify outstanding issues, your staff was greatly helped throughout this process.

Included in the binder packet of the Reclamation Plan is an index which lists each page and section number, the changes to the original plan, and the date of the change. This will hopefully expedite the final review of the Reclamation Plan.

The Reclamation Plan also includes a copy of the current financial condition statement which was previously submitted to the NRC in February 1999. The statement includes the annual surety update. This year's estimate reflects a total cost of \$9,846,746. We are requesting that the White Mesa Mill surety bond be increased to this amount as soon as the enclosed Reclamation Plan is approved.
