SUBJECT: WILLIAM B. MCGUIRE NUCLEAR STATION – OPERATOR LICENSING
WRITTEN EXAMINATION APPROVAL 05000369/2020/301 AND
05000370/2020301

Dear Mr. Moser:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examination at the William B. McGuire Nuclear Station.

The U.S. Nuclear Regulatory Commission (NRC) has approved the subject examinations, and you may administer the written examination in accordance with Revision 11 to NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," during the week of February 24, 2020. The NRC staff will administer the operating tests during the week of February 17, 2020. The list of the applicants approved to take the examination has been provided to your office. The examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (404) 997-4551.

Please contact your Chief Examiner, David R. Lanyi at (404) 997-4487 if you have any questions or identify any errors or changes in license level (reactor operator or senior reactor operator) or type of examination (partial or complete written examination or operating test, or both) specified for each applicant approved to take the examination.

Sincerely,

/RA/

Gerald J. McCoy, Chief
Operations Branch 1
Division of Reactor Safety
