9 March 82

Mr. John T. Collins
Regional Administrator, Region IV
U.S. Nuclear Regulatory Commission
611 Ryan Plaza Road, Suite 1000
Arlington, TX 76011

Reference: License R-23, Docket 50-59;
Letter C. A. Erdman to G. Madsen Dated 23 July 1981

Dear Mr. Collins:

Recently the Nuclear Engineering Department of Texas A&M University has received notification of the issuance of S.R.O. and R.O. licenses for our AGN-201M reactor to the following individuals:

<u>Name</u>	<u>Number</u>	<u>Effective Date</u>
C. A. Erdman	SOP-4136	13 January 1982
G. A. Schlapper	SOP-4210	16 January 1982
B. L. Willits	OP-5849	24 February 1982
D. C. Carpenter	OP-5850	24 February 1982

Based on this licensing action I have asked Dr. Schlapper to assume the duties of reactor supervisor and also to assume administrative responsibility for this facility replacing Dr. R. G. Cochran, who retains his license.

As Department Head, I shall retain final authority and ultimate responsibility for operation of the facility as outlined in the Technical Specifications. However, to expedite licensing matters and/or inspection activities, Dr. Schlapper should be the primary contact.

Sincerely,

C. A. Erdman
Department Head
