Mississippi Power & Light Company (MP&L) has completed its review and actions on IE Bulletin 82-01, "Alteration of Radiographs of Welds in Piping Subassemblies", for Unit 1.

A review of all Unit 1 radiographs which were supplied by Associated Piping Engineering has been completed by Welding Quality Control Engineers, each currently certified as Level II per SNT-TC-1A(75). Using the detection methods indicated in the Bulletin as a guide, no evidence was revealed that would indicate alteration of penetrometer "T" holes by penciling or coloring on the radiographic film surface.

This constitutes our response to IE Bulletin 82-01 for Unit 1. A separate response will be provided for Unit 2 within 90 days of restart of full construction. Should you have any further questions regarding this matter, please advise.

Yours truly,
