File: X7BG03-M21
Log: GN-167

Reference: Vogtle Electric Generating Plant - Units 1 and 2
50-424, 50-425 Derated/Abandoned Embeds

Attention: Mr. James P. O'Reilly

Gentlemen:

Georgia Power Company reported a potential deficiency to the NRC on February 22, 1982 concerning the use of derated/abandoned embed plates. An interim response to the NRC indicated that Georgia Power Company would inform the Commission of the results of our evaluation by April 30, 1982. The engineering evaluation that was performed for this item did not reveal any affect on the future safety of operations of Plant Vogtle. It has been concluded this potential deficiency is not reportable.

This response contains no proprietary information and may be placed in the NRC Public Document Room upon receipt.

Yours truly,

D. O. Foster
D. O. Foster
