Washington, D.C. 20555 (Dockets 50-247, 50236)

DOCKET NUMBER ~~50-247 SP~~  
FROM A UNIT TO ~~50-286 SP~~

Dear Mr. Carter,

I feel that there should be some appearance sessions here in New York City. Many of the people most affected by these decisions cannot afford to travel in Rockland and Westchester counties to make their voices heard. Indian Point is a mere thirty miles from N.Y.C. and a threat to all our safety. Yet there are no emergency evacuation plans beyond the ten-mile radius of the plant. I definitely feel that the portion of the hearings dealing with N.Y.C. should be held right here in the city.

Sincerely,

Helice Koffler

Dear Mr. Carter:

I am writing to request that you hold  
~~the~~ limited appearance sessions on the issue  
of the closing of the Indian Pt. Nuclear plant  
here in New York City. There are a very large  
number of City residents who are quite  
concerned about this issue, many of whom  
would find it an impossibility to travel to  
Westchester and Rockland County for such  
hearings. Every NYC resident is directly  
affected by the issue of Indian Point,  
and should have the opportunity to attend  
hearings at a location which is reasonably  
accessible. I urge you, therefore, to hold  
a session here in the city of New York.

Sincerely,  
Frank McDonald

Dear Mr Carter:

The magnitude of the dangers inherent in the management and maintenance (lack of) of nuclear facilities such as and specifically Indian Point, not to mention the lack of need for such facilities, and the danger of radioactive material, warrants an extension of hearings on the subject, preferably in New York City, where a wide exposure promises.

Please inform me of the dates and times of these hearings. I take this opportunity to respectfully request permission to make a short statement. I understand five (5) minutes is usual.

Thank you,

Sincerely

John Farina

March 19, 1982

Mr. Louis Carter, Chairman  
Atomic Safety and Licensing Board  
U.S. Nuclear Regulatory Commission  
1717 H Street N.W.  
Washington, D.C. 20555

Dear Mr. Carter:

It has come to my attention that the Atomic Safety and Licensing Board has been requested to move its proceedings to distant locations. It had been my impression that this question had been resolved to the end that you would continue to make your board and its proceedings easily accessible to residents of Cortlandt and neighboring communities, who need the information most.

No constituency has more right to or need for any access to the upcoming hearings than mine. An unfair burden would be placed on residents of Westchester and Putnam counties if the board meets anywhere outside the N.R.C.'s emergency planning area.

I look forward to hearing from you regarding this matter.

Sincerely,

A handwritten signature in cursive script, reading "Charles G. DiGiacomo".

Dear Judge Carter:

I understand that proposed public hearings on safety issues relating to the Indian Point nuclear power plant will be scheduled in the near future.

It is my opinion that such hearings would best serve the interests of the local community if they were scheduled within the ten-mile radius of the site where the views of the most affected members of the public could be solicited.

The areas most affected within Putnam County are located within the Towns of Putnam Valley and Philipstown.

Very truly yours,

David D. Bruen  
County Executive

Dear Sir,

I would like the opportunity to testify at the coming hearings in April in White Plains. My contention is that sirens can not become a workable method of notifying the public of an emergency due to their technical lack of reliability and the fact that they are controlled by radio signals which are themselves affected by nuclear radiation.

I am an electrical engineer and have designed sirens and other electrical devices for over 25 years. I am now the president of a telecommunications company.

Thanking you for your courtesy and response, I remain,

Sincerely yours,

Dear Mr. Carter:

Recently limited appearance hearings were held in Westchester and Rockland Counties concerning the Indian Point nuclear power plants. I would strongly urge the ASLB to hold similar hearings in New York City since the Bronx is only 24 miles from Indian Point and lower Manhattan is approximately 40 miles from Indian Point, we too would feel the severe effects of an accident at the plant. The problems of sheltering, evacuating and protecting millions of New York City residents would be overwhelming in the event of such an accident. Yet we are totally unprepared; there is no emergency plan for New York City. The Intercommunity Center for Justice and Peace is sponsored by 33 religious orders in the metropolitan New York area. The majority of our 10,000 members live in proximity to Indian Point.

We would also request that the ASLB hold the portions of the evidentiary hearing which deal with New York City in New York City.

Thank you very much for your attention to our concerns.

Sincerely,

Dear Mr. Carter:

We who live in the close vicinity of Indian Point Nuclear Plant, live in a virtual nightmare. In view of the horrendous safety record over the years, I feel a serious accident could occur anytime!

Provided that sirens could be heard and we were informed early enough and weather conditions were perfect I state that an evacuation is still impossible!

Mr. Carter and members, the only answer is that this plant must be closed. Am I and my family not entitled to our health and peace of mind?

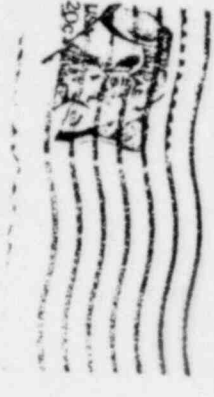

Sincerely,

(Mrs.) Helene T. Farrey

P.S. As I was drafting this letter, another problem occurred at Indian Point 3 today! As my 12 year old grandson so ably put it, "If this accident was so small, why did they have to close the plant?" (And they stated, it would take 1 week to enter the area.) I implore you, please help us.

April 1, 1982

Dear Judge Carter:

It has come to my attention that the Nuclear Regulatory Commission will soon be conducting public hearings on the Indian Point Nuclear Power Plant facility. These hearings will be addressing specific issues such as Emergency Planning, Plant Equipment and the Economical and Environmental Impact of a Plant Shutdown.

I officially go on record requesting that these hearings be held at places within the ten mile emergency planning zone surrounding the Indian Point facilities. Also, I request that should there be more than a single hearing, one of them be held in Orange County.

I have heard rumors to the effect that these Nuclear Regulatory Commission Hearings were to be held originally in New York City and now, supposedly, in White Plains. As both of these cities are outside the ten mile emergency planning zone, I hope that the rumor is not true.

The best place to conduct hearings concerning Indian Point Nuclear Power Plant and its associate safety planning is within the ten mile emergency planning area of the facility itself.

I look forward to your response.

Sincerely,

Honorable Louis J. Carter

Dockets 50-247, 50286

Dear Mr. Carter,

This letter is in reference to the  
Limited Appearance Sessions to be  
held in Westchester. As a voter concerned  
with the importance of educating the  
public I feel it is essential that these  
meetings be held in New York City.

Sincerely,

Patricia Gilberts

Dear Mr. Carter,

I'm writing to you to ask for a request and that is  
you hold Limited Appearance Sessions here in New York City.

Many residents here cannot go up to Rockland and  
Westchester Counties to make a statement. Indian Point's  
location is only 30 miles away from the city and if  
there were an accident at the plant, it would obviously  
affect us New Yorkers. I urge you to hold the portions  
of the hearings here in New York City.

I would appreciate it very much.

Sincerely,  
Joita Lazaro

Dear Mr. Carter,

This letter is in reference to the holding of Limited Appearance Sessions in the City of New York. The residents of N.Y.C. cannot afford to attend the hearings in Rockland & Westchester Counties to make statements. The plant being only 30 miles from Manhattan would directly effect all of New Yorkers in case of a major accident. Also there are no emergency evacuation plans beyond a ten mile radius of the plant. I strongly urge you to hold the portions of the hearings that deal with N.Y.C. in N.Y.C.

Sincerely,  
Sebastian Barone

DEAR MR. CARTER,

THIS LETTER IS TO REQUEST THAT YOU HOLD  
LIMITED APPEARANCE SESSIONS IN N.Y.C. MANY OF US  
CANNOT MAKE A STATEMENT ON THIS ISSUE BECAUSE  
WE ARE UNABLE TO GO UP TO ROCKLAND COUNTY IF  
THERE WAS A MAJOR ACCIDENT WE ARE NOT TOO  
FAR TO BE OUT OF REACH OF THE DELEGATION  
THEREFORE, I STRONGLY URGE YOU TO HOLD THE  
PORTIONS OF THE HEARINGS THAT DEAL WITH N.Y.C.  
IN NEW YORK CITY

SINCERELY,

Arthur Mergin

Dear Louis Carter,  
Chairman

I feel compelled to write you on the matters of the Indian Point Nuclear Power Plants. Being a resident of the Morris County area, I fear the highly probable occurrence of a core meltdown, which almost happened at Three Mile Island 2. If such an incident were to happen, up to 60,000 delayed cancer deaths could result beyond the 50 mile radius which includes my county. What happens to the people living closer is a nightmare in my mind!! Almost 10 % of the U.S. population live within this 50 mile radius, thus immediate deaths and delayed deaths from a major radiation release would be in the millions. Evacuation is impossible especially when many of the 288,000 people within 10 miles of the Indian Point 3 Plant didn't hear the warning when a simulated accident drill was conducted. The 2 million dollar system of 88 sirens sounded like "a steady hum" according to the Mayor of the village where the plant is located. If it had been a real accident, no one would have been properly warned and the people of the most densely populated area in the nation to live around a Nuclear Plant would be killed. That's certainly not a comforting thought. Unfortunately this isn't the only threat these plants create. The probability of an earthquake due to the close location of these Plants to the active Ramapo fault is one, the hazardous wastes produced are another horror to the well-being of man and his environment.

With all the problems and ill management control that have been so prevalent in all the Plants in the country and billions of dollars being spent on these "horrors" with no satisfying results, only more problems and costly shutdowns, I feel and many others feel that Nuclear Power is not the safest, most efficient way to produce electricity.

No doubt we have already been effected by these Plants, it's just a matter of time before the gruesome results show up in the American People's bodies, water and soil on which we so dependently exist. We must think of our future and the future of other generations. I don't want to die of cancer or have my children die of cancer from a Nuclear accident or it's wastes, I'd rather live in the dark!!! We must also think of our environment which we have abused and neglected for so long. It's time we started to work with Nature, instead of against it, for without it we die!! God has put enough energy on this earth for us to all live on naturely, Solar Power from the sun, Hydropower from the oceans, dams and rivers, even glaciers, Refuse Derived Plants using garbage to produce energy. Even chemically simulating the process of photosynthesis by plants can be used to create the energy we need along with windpower, also with advanced Space Technology, huge Solar Panels can be assembled to collect the sun's energy and return it to earth from space. We've been wasteful for too long! it's time we used all the alternatives we have for our energy problems. There's enough to worry about in this society to have the worry of being killed by radiation directly from the Plants or through contamination of the water and soil in our communities from improper disposal of the wastes.

It would be a wise decision to slowly get away from Nuclear energy, especially when the electric companys who charge us so much, wouldn't pay or be held responsible for the deaths of millions of their customers because of some ill operated Plant. It just doesn't seem right, does it?? Once again I say I'd rather live in the dark, then have our lives and land threatened by these insufficient plants!! Please send me a list of where and when Public hearings will be held on the Reactors so that I may attend and learn more about this threat to my community and many, many others!!

Sincerely yours,

Lisa Scharin of Kenilham, New Jersey

Dear Mr. Louis Carter:

As a concerned citizen, I'd like to know why  
the limited Appearance Session is being held in Upstate N.Y.  
and not in N.Y.C. also. As I'm sure you know, any accident that  
may occur up at Indian Pt. will affect the residents here in N.Y.C. also.  
This is why N.Y.C. residents ~~to~~ should have some input too.

Sincerely,

Nico Seltz'

Dear Mr. Carter,

I am writing to request that you hold a Limited Appearance Session in New York City. Since I live in New York along with many others, it would be too expensive and take too much time to go to Westchester and Rockland County to make a statement. Holding the Session in the City would allow more New Yorkers to be aware of this problem.

Sincerely,  
Lynda Nicolas

Dear Mr. Carter,

I am writing you because I cannot travel to Rockland & Westchester Counties and would like you to hold Limited Appearance Sessions here in the city. We in the city would be greatly affected by a problem at Indian Point and we ought to be allowed to make statements. I believe that discussions which will affect New York City should be held in the city.

Thank you for your attention to this matter.

Sincerely,  
Cathy Conner

Dear Mr. Carter:

I am requesting that you  
hold additional meetings -- in regard  
to the finding a solution to the Indian  
Point issues -- within the Borough  
of Manhattan, as commuting to  
Rockland or Westchester Counties  
poses a major inconvenience -- or is  
that your intent?!

Dear Sir,

As a concerned citizen, I demand that any public hearings concerning nuclear power in the New York area, include people from the five boroughs, Westchester, Rockland, etc. In order to do this I demand ~~that~~ as a taxpaying citizen, that a Public Hearing be held in N.Y.C. to deal with the concerns of people over our safety.

Yours,

Troley,

David Robinson
