Director
Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
ODYN Code Reanalysis Requirements
(Generic Letter 81-37)

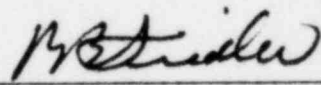

The following information is being provided in response to your letter of December 29, 1981 regarding the above referenced subject:

- 1) We plan to use General Electric OLYN Code for pressurization transient calculations beginning with the Cycle 10 reload design and safety analyses.
- 2) By our letter (from I.R. Finfrock, Jr., V.P., Jersey Central Power & Light Co. to Director, Nuclear Reactor Regulation, NRC) dated March 9, 1981, the results of pressurization transients by REDY for an Oyster Creek Nuclear Generating Station Cycle 10 reload core was submitted.
- 3) We plan to submit pressurization transient results by OLYN Code on or before June 30, 1982, and to determine option A or B at that time.

It is further anticipated that the Technical Specification Change Request No. 96 for the Oyster Creek Cycle 10 Reload application will also be submitted by June 30, 1982.

If you have any questions on this, please call Mr. James Knubel at (201) 299-2264.

Very truly yours,

Peter B. Fiedler
Vice President and Director
