Mr. John T. Collins, Regional Administrator
U. S. Nuclear Regulatory Commission
Region IV, Office of Inspection and Enforcement
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

Dear Mr. Collins:

River Bend Station Unit 1
Docket No. 50-458

On March 29, 1982 Gulf States Utilities Company (GSU) notified your office of a concern potentially reportable under 10CFR50.55(e). The subject of concern was unsatisfactory inspections performed by a former Field Quality Control (FQC) inspector at River Bend Station.

A reevaluation is being conducted of these inspections to determine if any inspections performed by the former FQC inspector were unacceptable and if they had gone undetected, could they have adversely affected the safe operations of the plant. A status report on the evaluation will be provided by August 6, 1982.

Sincerely yours,

William J. Booker
