SHEARON HARRIS NUCLEAR POWER PLANT, UNITS 1 & 2
DOCKET NOS. 50-400, 50-401
IMPROPER INITIALING OF SEISMIC I INSPECTION RECORDS

Dear Mr. O'Reilly:

On April 14, 1982, the NRC (Mr. C. Julian) was notified by Carolina Power & Light Company of an item considered potentially reportable per the provisions of 10CFR50.55 (e). The NRC was informed that an inspector (J. H. Root) used initials other than his own on Unit 1 and 2 Seismic I hanger inspection records (weld data reports).

The intent of this letter is to inform you that Carolina Power & Light Company has not been able to complete its evaluation concerning this matter due to the extent of inspection records involved. It is now anticipated that the reportability evaluation will be completed by June 15, 1982, at which time, the NRC will be informed of the results. Completion of any corrective action, if required, will depend on the results of the evaluations and extent of corrective action. If the item is deemed reportable, the NRC will be so notified, and the projected date of completion of corrective action and final report provided through submittal of an interim letter.

Thank you for your consideration in this matter.

Yours very truly,

N. J. Chiang - Manager
