T. C. NICHOLS, JR.  
VICE PRESIDENT AND GROUP EXECUTIVE  
NUCLEAR OPERATIONS

March 29, 1982

Mr. James P. O'Reilly, Director  
U. S. Nuclear Regulatory Commission  
Region II, Suite 3100  
101 Marietta Street, N. W.  
Atlanta, Georgia 30303

Subject: Virgil C. Summer Nuclear Station  
Docket No. 50/395  
Significant Deficiency  
Diesel Generators  
Nuclear Eng. File 3.1051

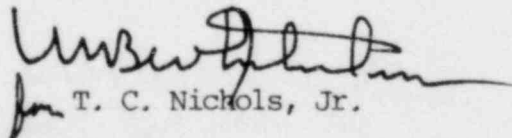

Dear Mr. O'Reilly:

On September 9, 1981, Mr. Virgil Brownlee of NRC Region II was notified of a significant deficiency per 10CFR50.55(e) concerning the pipe supports on the Diesel Generator fuel oil return line. An interim 30 day report was written on September 10, 1981. The corrective action of the 30 day report was to reinstall the pipe supports on the fuel oil return line to manufacturer's requirements. The Colt supplied drawings for the diesel did not specifically address pipe support locations on the fuel oil return lines. Supports were installed to their approximate original location and as-built sketches submitted to Colt for verification and incorporation on applicable drawings. Colt supplied South Carolina Electric and Gas with drawings giving a pipe support spacing criteria for the fuel oil return lines. The supports have been installed to the spacing criteria requirements as indicated on the manufacturer's drawings.

The information in this letter serves as the final report.

If you have any questions, please advise.

Very truly yours,

  
for T. C. Nichols, Jr.
