EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

02	The only operable Control Room Airborne Radiation Monitor was removed from service for																																																																															
03	preventive maintenance between 1005 and 1300 hours. T.S. 3.3.2.b and Action 13 to																																																																															
04	Table 3.3-3 require the Control Room Emergency Air Cleanup System to be maintained in																																																																															
05	the emergency mode of operation within 1 hour. T.S. 3.3.2.b was violated for 1 hour																																																																															
06	and 55 minutes. Both Train A and B of the Emergency Air Cleanup System were operable																																																																															
07	and could have been activated manually. Public health and safety were not affected.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10	Train A, Train B, and the Airborne Radiation Monitor were independently removed from																																																																															
11	operation without the full significance of these actions being noted by the R.O. Oper-																																																																															
12	ators and equipment control personnel have been cautioned to be aware of similar possi-																																																																															
13	bilities in the future. The capability of using the equipment control form to call out																																																																															
14	the use of caution tags has also been reiterated.
