LICENSE NOS. DPR-71 AND DPR-62
SPENT FUEL POOL STORAGE MODIFICATION
SUPPLEMENTAL INFORMATION

Dear Mr. Vassallo:

On April 5, 1982, Carolina Power & Light Company (CP&L) provided supplemental information regarding the Spent Fuel Pool Cleanup System in support of our April 16, 1981 license amendment request.

In the enclosure to our letter of April 5, 1982, we stated that "the primary reason for a difference in water quality guidelines for the spent fuel pool and condensate storage tank is that the spent fuel pool has a heat exchanger with a saltwater interface which could result in some intrusion."

The statement should read "...has a heat exchanger with an indirect saltwater interface which could result in some intrusion."

We hope this clarification is of value to you in the ongoing review of our April 16, 1981 amendment request.

If you have any questions regarding this clarification, please contact my staff.

Yours very truly,

S. R. Zimmerman
Manager
