NUCLEAR PRODUCTION DEPARTMENT

June 4, 1982

U.S. Nuclear Regulatory Commission  
Office of Nuclear Reactor Regulation  
Washington, D.C. 20555

Attention: Mr. Harold R. Denton, Director

Dear Mr. Denton:

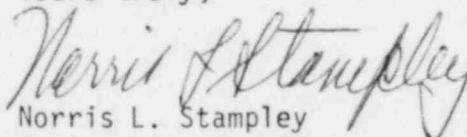

SUBJECT: Grand Gulf Nuclear Station  
Units 1 and 2  
Docket Nos. 50-416 and 50-417  
File 0272/L-860.0  
Readiness of Plant to Support  
Fuel Load, Request for  
Operating License  
AECM-82/253

I take this opportunity to formally advise you that the design, construction, and initial testing of Grand Gulf Nuclear Station (GGNS) Unit 1 is essentially complete. These activities have been planned and carried out in accordance with the plant's Final Safety Analysis Report and supporting documents. Regarding items not completed prior to the anticipated Unit 1 fuel load, MP&L has evaluated their delay and has concluded that there will be no adverse impact to the safe operation of the plant or to the health and safety of the general public or plant personnel. These incomplete items are evaluated and tracked as described in the Mississippi Power & Light (MP&L) letter to J.P. O'Reilly, dated May 25, 1982, AECM-82/228.

It is MP&L's conclusion that the plant is ready for fuel loading and, therefore, request an operating license for GGNS Unit 1.

Please advise if additional information is required.

Yours truly,

  
Norris L. Stampley  
Senior Vice President
