Dear Sir or Madam:

Advanced Nuclear Medicine, LLC would like to provide the additional information you requested:

1. OIA partners with healthcare providers such as health systems, academic medical centers, and radiology groups to develop, market and operate quality, patient friendly, service oriented outpatient imaging centers. OIA's business model is to invest equity in each project alongside its local partners while providing development, management, marketing, billing and collection services to the joint venture. OIA's management team, which possesses more than a combined sixty years of experience managing freestanding and hospital based facilities, provides a turnkey solution that minimizes the effort and risks involved in operating outpatient imaging centers. OIA centers range from single to full-modality facilities offering PET/CT, MR, CT, ultrasound, mammography, nuclear medicine, bone densitometry (DEXA) and plain film X-ray procedures. OIA was founded in 2000 and is headquartered in Nashville, Tennessee. It operates over thirty outpatient imaging centers in nine states. The reporting chain for the RSO is as follows: Dr. John Dean (RSO) – Susan Hawkins (Senior Director of Operations) – Shelly Troutman (Executive VP of Operations).
2. Requested documentation of accreditations and state licensing and registration is enclosed with this letter.
3. The only 35,300 materials used were I-131 sodium iodide doses given to patients. The last time these materials were used were approximately 8 years ago.
4. All 35,300 material was administered as I-131 NaI capsules and any waste products were decayed in storage. The last of this material was disposed of several years ago.
5. No 35,300 materials were transferred to another licensee or disposal company.

If there are any questions concerning this information, please contact Mr. Bryce A. Caudle, M.S., DABSNM at 317-443-9035, by email at bcadule@mpecphysics.com.

Sincerely,

Todd Rayburn
