EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

On March 23, 1982 at 1348 hours due to a local radiation emergency declared for the Intermediate Building, North, the fire watch posted, as a result of S-15 isolation valve being closed, was evacuated from the area. Therefore this fire suppression system was inoperable without a fire watch which is a violation of a ICO defined in Technical Specification 3.14.3.1 and reportable based on Technical Specification 6.9.2.2a(2).

Attachment to LER 82-010/01T-0  
Rochester Gas and Electric Corporation  
R. E. Ginna Nuclear Power Plant, Unit No. 1  
Docket No. 50-244

On March 23, 1982 at 1348 hours a local radiation emergency was declared at Ginna Station in the Intermediate Building North which required local evacuation. Fire watch personnel in accordance with plant procedure SC-1.5, Step 3.4 were evacuated from the area.

Prior to this event, the fire suppression system was isolated as described in LER 81-018/03L. The fire watch had been posted in this fire suppression area to satisfy the requirements of Technical Specification 3.14.3.1.

Following recovery from this event, the fire watch was returned to the area at 1525 hours. Therefore the fire suppression area did not have fire watch posted for a total of one hour and thirty-seven minutes.

At no time during this event was there any need for the fire suppression system that was inoperable.
