Region II  
ATTN: James P. O'Reilly, Regional Administrator  
101 Marietta Street, Suite 3100  
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

OFFICE OF INSPECTION AND ENFORCEMENT BULLETIN 80-20 -RII:JPO 50-518,  
-519, -520, -521, -553, -554 - HARTSVILLE AND PHIPPS BEND NUCLEAR  
PLANTS

Please reference our interim responses to the subject bulletin dated  
September 12, 1980, February 10, June 15, August 14, and October 30,  
1981. This letter constitutes our final response to the subject  
bulletin.

Responses from GE have been received which confirm that no  
Westinghouse type W-2 switches are used in either the STRIDE or NSSS  
portions of the Hartsville and Phipps Bend Nuclear Plants. We,  
therefore, consider this bulletin closed for these plants.

As discussed with NRC-OIE, Region II, Inspector Austin Hardin on  
January 29, 1982, TVA was granted a 21-day extension on the  
submittal of this response.

To the best of my knowledge, I declare the statements contained  
herein are complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
