101 Marietta St., N.W., Suite 3100
Atlanta, Georgia 30303

Attention: Mr. J. Philip Stohr

Dear Sir:

SUBJECT: Grand Gulf Nuclear Station
Units 1 and 2
Docket Nos. 50-416 and 50-417
File 0260/0277/L-860.0/0755
NRC Region II Emergency Response
AECM-82/93

Your letter of February 12, 1982 contained a correction to the enclosure of your letter dated January 29, 1982. The enclosure addresses those items included as general guidance in NUREG-0696, "Functional Criteria for Emergency Response Facilities", and indicates these are items you feel are required in order to perform your emergency duties in the Grand Gulf Nuclear Station (GGNS) Technical Support Center (TSC) and Emergency Operations Facility (EOF).

In AECM-81/52, dated February 12, 1981, and AECM-81/25, dated April 8, 1981 (copies enclosed), we transmitted to you a description of what would be provided in the GGNS emergency response facilities. The provisions for space and equipment are based on GGNS site-specific characteristics and design, and were demonstrated to be adequate in the NRC-reviewed emergency exercise held last November. They do not encompass all of the items in NUREG-0696, because many of those items are not technically feasible or possible; for example, our telephone company representatives inform us the requested consoles cannot handle all of the lines listed in item B.5. We do feel, however, that what we will be providing will be sufficient for your needs.

If you have any further questions, please contact this office.

Yours truly,

L. F. Dale
Manager of Nuclear Services
