Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Virgil C. Summer Nuclear Station
Docket No. 50/395
Source Range Instrumentation for
Alternate Shutdown System

Dear Mr. Denton:

As requested by your letter of March 31, 1982, South Carolina Electric and Gas Company will provide a source range neutron flux monitor either at the control room evacuation panel or at another location independent of the control complex. The installation will be completed prior to startup after the first refueling. We expect to use equipment similar to the existing source range instrumentation.

If you have any questions, please let us know.

Very truly yours,

T. C. Nichols, Jr.
