Region II
ATTN: James P. O'Reilly, Regional Administrator
101 Marietta Street
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

HARTSVILLE NUCLEAR PLANT A - REPORTABLE DEFICIENCY - BETHLEHEM STEEL
COMPANY'S GALVANIZED A325 BOLTS - HTRD-50-518/81-28, -520/81-27

The subject deficiency was initially reported to NRC-OIE, Region II, Inspector P. A. Taylor on October 29, 1981 as NCR HTA HPP 8103. Applicability to 10 CFR Part 21 was determined to be nonreportable as discussed with Inspector Taylor on November 5, 1981. Our first, second, and third interim reports were submitted on November 23, 1981 and February 10, and March 31, 1982, respectively. In accordance with paragraph 50.55(e) of 10 CFR Part 50, this letter constitutes our fourth interim report on the subject deficiency.

TVA has elected to defer construction activities for this project. Deferral does not mean that the project will be cancelled but that TVA is minimizing its expenditures and construction efforts until such time that TVA has sufficient information to indicate whether the project should be completed or cancelled. Therefore, we will not be submitting a final report for this nonconformance until a final decision is made regarding this project. If have any questions, please call Jim Domer at FTS 858-2725.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
