Attention: F. J. Long

The Georgia Power Company wishes to submit the following additional information to our April 26, 1982 response to your inspection report 50-424/82-05 and 50-425/82-05.

During Mr. Kleinsorges's inspection, Georgia Power Company's initial response was that the affected weld was not acceptable. After Mr. Kleinsorge's inspection and further investigation of specification requirements, a thorough inspection of the cited weld was conducted by a team of qualified visual welding inspectors. As a result of this additional inspection effort, we do not concur with the finding identified concerning "Failure to Follow Inspection Procedures".

This response contains no proprietary information and may be placed in the NRC Public Document Room upon receipt.

Yours truly,

D. O. Foster  
Project General Manager

DOF/CWH/tlp

Mr. F. J. Long
