Docket No. 50-368
License No. NPF-6
Additional Information on Inspection Report
50-368/81-24 on Operability Specification
(File: 2-0232)

Gentlemen:

In a letter dated March 30, 1982, (2CAN038212) AP&L committed to propose Technical Specification changes on ANO-1 and ANO-2 to resolve concerns on surveillance requirements and their relation to operability status by May 14, 1982. However, due to the recent ANO-1 and ANO-2 outages we have been unable to complete the formal review of our proposed changes. Therefore, we must request an extension of two weeks, or until May 28, 1982, for our submittal of the proposed Technical Specifications.

Very truly yours,

John R. Marshall
Manager, Licensing
