Mr. John T. Collins, Regional Administrator  
U. S. Nuclear Regulatory Commission  
Region IV, Office of Inspection and Enforcement  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76011

Dear Mr. Collins:

River Bend Station Unit 1  
Docket No. 50-458  
Final Report/DR-56

On May 24, 1982, Gulf States Utilities Company (GSU) informed the Nuclear Regulatory Commission's Region IV Office of conditions potentially reportable under 10CFR50.55(e) concerning Liberty Control Company telephone relays and IAC (Instantaneous Alternating Current) overcurrent relays (DR-56). GSU's architect engineer, Stone & Webster (S&W), and Nuclear Steam Supply System Vendor, General Electric (GE), have evaluated the subject deficiencies for reportability. GSU concludes from S&W and GE's review that the deficiencies are not reportable under 10CFR50.55(e). This completes GSU's response on this issue.

Sincerely,

J. E. Booker  
Manager-Engineering & Licensing  
River Bend Nuclear Group
