OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

Peter B. Bloch, Chairman  
Atomic Safety & Licensing Board  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Re: In the matter of:  
Cleveland Electric Illuminating Co.  
Docket Nos. 50-440-OL  
50-441-OL

Dear Chairman Bloch:

First of all, I would like to report a change in my address and telephone number which is given above. Would all parties please change my address on the Service List.

The remaining part of this letter will consist of my notes on the conference call that was placed on July 13, 1982. Participating in this conference, were Chairman Bloch, and I assume the other members of the panel, Mr. Silberg; Mr. Vogler; Ms. Hiatt and the undersigned. The purpose of the call was to discuss the Motion filed by Applicant to Dismiss Sunflower's Motion to Compel Discovery. After discussion, Judge Bloch denied this Motion. Judge Bloch then established the following standards for future Motions to Compel:

- 1) the regulatory ten day period to file the Motion;
- 2) an automatic five day extension of the above period;
- 3) an additional five day extension with consent of the parties involved;
- 4) any additional time to file the Motion can then be granted only by the Board.

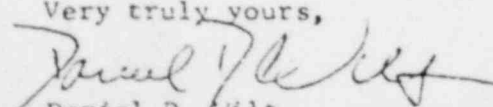

Mr. Silberg was granted two weeks from July 13, 1982 to file a response to Sunflower's Motion to Compel. Staff was granted five days after that to file a response.

The parties were then directed by the Board to begin negotiations on the following matters:

- 1) a deadline on discovery;
- 2) a deadline on discovery on newly admitted contentions;
- 3) proposed dates for the hearings;
- 4) proposed deadlines for filing proposed findings of fact.

Judge Bloch suggested that proposed findings of fact should present reasoned findings that comment on the facts from the standpoint of the law and regulations. Parties are permitted to present alternative lines of reasoning. The conference was then concluded.

Very truly yours,

  
Daniel D. Wilt
