Washington, D. C. 20555

Gentlemen:

River Bend Station - Unit 1
Refer to : Region IV
Docket No. 50-458/Report 89-11

In a response dated December 15, 1989 to the Notice of Violation contained in NRC Inspection Report No. 50-458/89-11, Gulf States Utilities Company (GSU) described several corrective steps which will be taken to prevent violations of Administrative Procedure (ADM)-0027, "Protective Tagging." One of the corrective steps regards the implementation of a new computerized tagging system. The computerized program is currently being developed, however, a recent problem in the hard copy output was discovered. Despite the delay in implementation, the new system remains scheduled for use in the upcoming third refueling outage.

Should you have any questions, please contact Mr. L. A. England at (504) 381-4145.

Sincerely,

W. H. Odell
Manager-Oversight
River Bend Nuclear Group
