Docket No. 50-267

SUBJECT: FPOR 18, Issue 3

REFERENCES: 1) NRC Letter, Heitner to Williams, dated May 18, 1989
(G-89185)
2) NRC Letter, Erickson to Crawford, dated March 28,
1990 (G-90041)

Gentlemen:

Enclosed is one original and ten additional copies of the Fire Protection Operability Requirement (FPOR) 18, Issue 3, and the revised Table of Contents (TOC), Issue 10. The TOC and FPOR should be inserted as replacement pages in Section FP.6.1 of the Fort St. Vrain (FSV) Fire Protection Program Plan as approved in Reference 1. FPOR-18 is being transmitted under the requirements of 10CFR50.71(e).

The need for this FPOR change was brought about as a result of Revision 3 to the FSV Fire Protection Program Plan (FPPP) as approved by the NRC in Reference 2. Revision 3 to the FPPP defined new Fire Protection Cooldown Trains applicable to FSV during defueling.

FPOR-18 ensures that ladders for access to various plant components and equipment are in the locations specified in Table FPOR-18-1 and that they are functional. The ladders are used as an aid in performing a number of manual actions associated with lining up the Fire Protection Cooldown Trains (FPOR-16).

A 10CFR50.59 safety evaluation was performed on Issue 3 of FPOR-18. The evaluation determined that the revisions were not safety related or safety significant, and did not involve or create an unreviewed safety question. The revisions do not require changes to the FSV Technical Specifications.
