Mr. Samuel J. Chilk, Secretary
United States Regulatory Commission
Document Control Desk
Washington, D.C. 20555

Subject: Comments on Proposed Rule Making Concerning Final Safety Analysis
Report Revision (PR55FR18608)

Dear Mr. Chilk:

Toledo Edison is pleased to provide comments on the subject proposed rulemaking as requested by the Nuclear Regulatory Commission (NRC) in the May 3, 1990, Federal Register 55FR18608.

Toledo Edison has reviewed the proposed changes to 10CFR50.71(e)(4) concerning the frequency of Final Safety Analysis Report (FSAR) revisions and the Nuclear Management and Resources Council (NUMARC) position regarding these proposed changes. Toledo Edison endorses the NUMARC position regarding this proposed change. Toledo Edison agrees that revising the update frequency to following refueling outages would in many cases provide a more timely, accurate reflection of the facility than the current annual revision requirement.

If you have any questions concerning this matter, please contact Mr. R. W. Schrauder, Manager - Nuclear Licensing, at (419) 249-2366.

Very truly yours,

JCS/mmb
