Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Removal of Cycle-Specific Parameter Limits

References: 1. Letter from J.C. Brons to NRC, IPN-90-C34, dated June 21, 1990, entitled
"Proposed Changes to Technical Specifications Regarding Removal of
Cycle-Specific Parameter Limits in Accordance with Generic Letter 28-16"

Dear Sir:

Reference 1 submitted proposed Technical Specification changes to relocate cycle-specific parameter limits to a utility controlled "Core Operating Limits Report (COLR)." Included was a proposed change to substitute all references to Figure 3.10-2, the hot channel factor normalized operating envelope, with reference to the COLR. One such change to page 3.10-9 was inadvertently omitted. A corrected 3.10-9 page is enclosed and should be used in place of the originally submitted page.

If you have any questions regarding this matter, please contact Mr. P. Kokolakis of my staff.

Very truly yours,

John C. Brons
Executive Vice President
Nuclear Generation
