Subject: Catawba Nuclear Station Units 1 & 2
Docket Nos. 50-413, 414
Supplement 2 to the Proposed Technical
Specification Amendments Which Revised the
Frequency of the Radiological Effluent Report

Gentlemen:

By letter dated February 25, 1993 and supplemented May 20, 1993, Duke Power submitted proposed amendments to the Technical Specifications (TS) for Catawba and Oconee Nuclear Stations which revised the frequency of the Radiological Effluent Report. Subsequently, during a review of TS, additional references to the Semiannual Radiological Effluent Report were discovered in the Catawba TS that were not included in the original submittal nor in the supplement. Attached, find the additional marked up TS pages to be included with the original submittal and supplement. Attachment I (Technical Discussion, No Significant Hazards and the Environmental Impact Analysis) contained in the original submittal remain valid. A copy of this revised submittal has been sent to the appropriate South Carolina state official.

If you have any questions concerning the enclosed information, please call A.D. Jones-Young at (704) 382-3154.

Very truly yours,

G. W. Grier
