Gentlemen:

SUBJECT: Application for Amendment of Operating License

Enclosed please find Omaha Public Power District's (OPPD) "Application for Amendment of Operating License," which seeks to amend Technical Specification 2.1.4 of the Fort Calhoun Station Unit No. 1 Technical Specifications. This submittal supplements the application submitted by Reference 3 based on conversations between Mr. S. D. Bloom of NRR and members of my staff concerning the addition of a 30 day time limit for radiation monitors to be inoperable which is consistent with the Combustion Engineering Standard Technical Specifications.

Attachment A contains replacement pages reflecting the requested changes of the Technical Specification. The Discussion, Justification and No Significant Hazards Considerations transmitted in Reference 3 has not been revised.

If you have additional questions, or require further information, please do not hesitate to contact me or members of my staff.

Sincerely,

*W. G. Gates*
