Attention: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Subject: Proposed Change No. 106 to Technical Specifications
Primary and Secondary Containment Integrity
Cooper Nuclear Station
NRC Docket No. 50-298, DPR-46

Reference: G. R. Horn to J. L. Milhoan (NSD930779), dated June 22, 1993, Status
of Issues Related to Unit Startup

In accordance with the applicable provisions specified in 10 CFR 50, the Nebraska Public Power District (District) requests that the Cooper Nuclear Station (CNS) Technical Specifications be revised as specified in the attachment. The requested changes revise Technical Specification sections pertaining to the Standby Gas Treatment System (Section 3/4.7.B), Secondary Containment (Definition 1.0.V, Section 3/4.7.C, and the corresponding Bases section), and Primary Containment Isolation Valves (Definition 1.0.P and Section 3/4.7.D) for consistency with NUREG-1433, Standard Technical Specifications for General Electric Plants (BWR/4). The portion of the proposed change affecting Secondary Containment is in response to commitments made by the District in the above reference.

Other proposed changes include page renumbering, capitalization of defined terms, making consistent the use of terms "containment automatic isolation valves" and "ventilation system automatic valves", and various other miscellaneous changes.

The attached contains a description of the proposed change, the attendant 10 CFR 50.92 evaluation, and the applicable revised Technical Specification pages in both final and marked up forms. This proposed change has been reviewed by the necessary Safety Review Committees and incorporates all amendments to the CNS Facility Operating License through Amendment 165 issued July 16, 1993. In order to facilitate the orderly revision of affected plant procedures, the District requests that the amendment, associated with the proposed change, become effective 60 days after its issue date.

By copy of this letter and attachment, the appropriate State of Nebraska official is being notified in accordance with 10 CFR 50.91(b)(1). Copies to the NRC Region IV Office and the CNS Resident Inspector are also being sent in accordance with 10 CFR 50.4(b)(2).
