Technical Specifications Change Request

Gentlemen:

Philadelphia Electric Company (PECo) is submitting Technical Specifications (TS) Change Request No. 93-11-0, in accordance with 10 CFR 50.90, requesting an amendment to the TS (Appendix A) of Operating License Nos. NPF-39 and NPF-85 for Limerick Generating Station (LGS), Units 1 and 2, respectively. This proposed TS change will revise TS Section 3.3.7.8.2 and associated Bases 3/4.3.7.8 regarding the Main Control Room (MCR) toxic gas detection system. This proposed TS change will reflect implementation of a modification designed to change the MCR high toxic chemical concentration alarm logic, thereby reducing the number of false high toxic chemical concentration alarms received by the MCR. Information supporting this TS Change Request is contained in Attachment 1 to this letter, and the proposed replacement pages for the LGS, Units 1 and 2, TS are contained in Attachment 2.

We request that, if approved, the amendments to the LGS, Units 1 and 2, TS be issued by November 1, 1993, to support implementation of the modification and that these amendments be effective within 15 days following issuance of the amendments.

If you have any questions, please do not hesitate to contact us.

Very truly yours,

*G. A. Hunger, Jr.*
