SUBJECT: Peach Bottom Atomic Power Station, Units 2 and 3
 Technical Specifications Change Request 92-18, Supplement

REFERENCE: Letter from G. J. Beck, PECO to US NRC, dated February 25, 1993

Dear Sir:

Philadelphia Electric Company (PECO) hereby supplements Technical Specifications Change Request (TSCR) No. 92-18, in accordance with 10 CFR 50.90, requesting a change to Appendix A of the Peach Bottom Facility Operating Licenses. The proposed Technical Specification Changes, submitted in the referenced letter, are intended to make the Effluent Report an annual submittal as allowed by recently revised 10CFR50.36(a). This supplement to TSCR 92-18 is being submitted to amend the date of submitting the Effluent Report, as requested by the NRC.

PECO proposes that the first sentence in TS 6.9.2.h.(2) on page 259 be revised to read: "Routine radioactive effluent release reports covering the previous calendar year shall be submitted prior to May 1 of each year." The information supporting a finding of no significant hazards provided in the reference letter is unaffected by this supplement.

Attachment 1 contains the revised Technical Specification page 259. The original TSCR submitted changes to TS pages 207, 212, 216b-2 and 259; however, this revision amends only page 259. The revisions to the remaining pages as submitted in the February 25, 1993 letter are still requested.

If you have any questions regarding this matter, please contact us.

Very truly yours,

G. A. Hunger, Jr.
