South Texas Project
Units 1 and 2
Docket Nos. STN 50-498; STN 50-499
Revision of Emergency Action Level Table

The Houston Lighting & Power Company (HL&P) submits the attached revision to its emergency classification procedure for events at the South Texas Project. This revision is based on guidance contained in NUMARC/NESP 007. This revised procedure has been reviewed with the State of Texas and Matagorda County and their comments have been incorporated. The revised procedure has been approved by the Station's Plant Operations Review Committee and will be approved by the Plant Manager following concurrence by the Nuclear Regulatory Commission.

Some differences between the NUMARC guidance and this procedure exist. These differences are described in Attachment 2.

We request approval of this revised procedure to permit implementation on January 1, 1994, in conjunction with implementation of changes to 10CFR20 and Environmental Protection Agency Protective Action Guidelines.

If there are any questions, please contact Mr. M. A. Covell at (512) 972-7479 or me at (512) 972-7921.
