Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
Monthly Operating Reports for August 1993
San Onofre Nuclear Generating Station, Units 2 and 3

Technical Specification 6.9.1.10 of Facility Operating Licenses NPF-10 and NPF-15 for the San Onofre Nuclear Generating Station, Units 2 and 3, respectively, requires SCE to provide a Monthly Operating Report for each Unit, which includes: routine operating statistics and shutdown experience; all challenges to safety valves; any changes to the Offsite Dose Calculation Manual (ODCM); and any major changes to the radioactive waste treatment system. All covered activities are reported monthly, except for ODCM changes, which are reported within 90 days from the time the changes were made effective.

This letter transmits the August 1993 Monthly Operating Reports for Units 2 and 3, respectively. There were no challenges to safety valves, no changes to the ODCM, and no major changes to the Units 2 and 3 radioactive waste treatment systems during the reporting period.

Attachment A to the Enclosure provides a revised "Operating Status" sheet for the July 1993 Monthly Operating Report to correct the Capacity Factors reported for Unit 3.

If you require any additional information, please let me know.

Sincerely,

Enclosures
