Docket No. 50-285

APPLICATION FOR AMENDMENT
OF
OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U. S. Nuclear Regulatory Commission ("the Commission"), Omaha Public Power District, holder of Facility Operating License No. DPR-40, herewith requests that the Technical Specifications set forth in Appendix A to that License be amended to implement changes which reflect the new 10 CFR Part 20 and administrative changes.

The proposed changes in Technical Specifications are provided in Attachment A to this Application. A Discussion, Justification and No Significant Hazards Consideration Analysis, which supplements that provided by an application for amendment dated May 21, 1993, is appended in Attachment B. The proposed changes in specifications would not authorize any change in the types or any increase in the amounts of effluents that will be released or a change in the authorized power level of the facility.

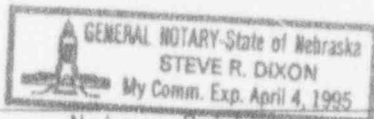

WHEREFORE, Applicant respectfully requests that Specifications 5.9, 5.11, and 5.16 of Appendix A to Facility Operating License No. DPR-40 be amended in the form attached hereto as Attachment A.

A copy of this Application, including its attachments, has been submitted to the Director - Nebraska State Division of Radiological Health, as required by 10 CFR 50.91.
