SEPTEMBER 22, 1993

Docket No. 50-364

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D.C. 20555

Joseph M. Farley Nuclear Plant - Unit 2
Technical Specification Changes Associated with
Steam Generator Tube Support Plate Interim Plugging Criteria

Gentlemen:

By letter dated July 29, 1993, Southern Nuclear submitted a proposed interim plugging criteria for use at Unit 2 of the Farley Nuclear Plant. Recent discussions with the NRC Staff have indicated a need to revise Page 3/4 4-26 of the proposed revised technical specification.

As a result, a revised Page 3/4 4-26 is provided in Attachment 1. The modification to Page 3/4 4-26 does not change the conclusions reached in the Significant Hazards Consideration Analysis submitted on July 29, 1993.

If there are any questions, please advise.

Respectfully submitted,

Dave Morey
