

**UNITED STATES
NUCLEAR REGULATORY COMMISSION**
WASHINGTON, D.C. 20555-0001

March 9, 2020

LICENSEE: Northern States Power Company

FACILITY: Prairie Island Nuclear Generating Plant, Units 1 and 2

SUBJECT: SUMMARY OF FEBRUARY 18, 2020, MEETING WITH NORTHERN STATES POWER COMPANY, CONDUCTING BUSINESS AS XCEL ENERGY, ON POTENTIAL LICENSE AMENDMENT REQUEST RELATED TO LOW TEMPERATURE OVERPRESSURIZATION PROTECTION AT PRAIRIE ISLAND NUCLEAR GENERATING PLANT, UNIT 1 AND 2 (EPID: L-2020-LRM-0012)

On February 18, 2020, a Category 1 public teleconference was held between the U.S. Nuclear Regulatory Commission (NRC) and representatives of Northern States Power Company, conducting business as Xcel Energy (Xcel Energy). The purpose of the meeting was to discuss a potential license amendment to remove a note from technical specifications limiting condition for operation (LCO) 3.4.12 and LCO 3.4.13 for Prairie Island Nuclear Generating Plant, Units 1 and 2. The note supports the low temperature overpressurization protection (LTOP) analysis. The meeting notice and agenda, dated February 7, 2020, are available in the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML20038A118. A list of attendees is provided as Enclosure 1.

The licensee presented information (ADAMS Accession No. ML20057D308) related to the potential license amendment request and an overview of the planned application.

The NRC staff noted that the amendment request should contain the portions of the LTOP analysis that support the proposed amendment (e.g. input conditions to the analysis). The NRC staff also queried Xcel Energy on the planned amendment submittal date. Xcel Energy indicated that the submittal is planned for the end of March 2020.

Members of the public were not in attendance.
