Edwin I. Hatch Nuclear Plant
Transmittal of Technical Specification Pages for
Implementation of the New 10 CFR 20 Requirements

Gentlemen:

By letter dated September 21, 1992, Georgia Power Company (GPC) submitted a request to relocate the procedural details contained in the Units 1 and 2 Radiological Effluent Technical Specifications to documents controlled by GPC. Among other things, this submittal proposed changes to Units 1 and 2 Technical Specification section 6.17, "Offsite Dose Calculation Manual," and proposed the creation of a new Units 1 and 2 Technical Specification section 6.18, "Radioactive Effluents Controls Program." Proposed Unit 1 Technical Specification page 6-23 and proposed Unit 2 Technical Specification page 6-22 provided in the submittal contain all of section 6.17 and a portion of section 6.18.

By letter dated October 14, 1992, GPC submitted a request to revise the Units 1 and 2 Technical Specifications to incorporate the requirements of the new 10 CFR 20. This submittal also included changes to sections 6.17 and 6.18 on Unit 1 Technical Specification page 6-23 and Unit 2 Technical Specification page 6-22. The version of Unit 1 page 6-23 and Unit 2 page 6-22 submitted on October 14, 1992 incorporated the changes included in the September 21, 1992 submittal.

By letter dated May 3, 1993, GPC submitted a request to revise the Units 1 and 2 Technical Specifications to change the frequency of the Radioactive Effluent Release Report from semiannual to annual. This submittal also included changes to Unit 1 Technical Specification page 6-23 and Unit 2 Technical Specification page 6-22. When the markups for the May 3, 1993 submittal were being prepared, the changes should have included the changes contained in the submittal dated October 14, 1992. This would have captured all of the changes made to these pages by all three submittals. However, the versions of the pages included in the submittal dated September 21, 1992 were used. Therefore, the most recent version of these pages submitted does not include the changes made by the submittal dated October 14, 1992. Specifically, the portions of these pages pertaining to 10 CFR 20 reference the old 10 CFR 20 section numbers instead of the new 10 CFR 20 section numbers.

Page Two

The purpose of this submittal is to provide the appropriately consolidated versions of proposed Unit 1 Technical Specification page 6-23 and Unit 2 Technical Specification page 6-22. These versions incorporate all of the changes made by all of the above referenced submittals.

The enclosure to this letter provides page change instructions for incorporating the proposed changes. Following the enclosure are the proposed Technical Specification pages and the associated markups of the pages. The markup pages consist of the typed page submitted on October 14, 1992 marked up to show the changes proposed by the letter dated May 3, 1993.

All of the changes being submitted have been previously submitted and evaluated per 10 CFR 50.92. This submittal merely provides the appropriate version of the subject pages incorporating all of the previously submitted proposed changes. Therefore, the conclusions of the significant hazards evaluations contained in previous submittals dated September 21, 1992, October 14, 1992, and May 3, 1993 are still valid.

In accordance with the requirements of 10 CFR 50.91, a copy of this letter and all applicable enclosures will be sent to the designated state official of the Environmental Protection Division of the Georgia Department of Natural Resources.

Sincerely,

A handwritten signature in dark ink, appearing to read "J. T. Beckham, Jr.".

J. T. Beckham, Jr.
