

MFN 157-93
Docket No. STN 52-001

September 30, 1993

Document Control Desk
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. Jerry N. Wilson, Acting Director
Standardization Project Directorate

Subject: Submittal of SSAR/Tier 1 Cross Reference Material
for the GE ABWR

Reference: 1) GE letter to Document Control Desk, Attention Jerry N.
Wilson, dated August 31, 1993, MFN No. 138-93, Docket No.
STN 52-001
2) Letter Dennis M. Crutchfield to Patrick W. Marriott,
subject, "Guidance on the Form and Content of a Design
Control Document," undated, Docket No. 52-001.

Gentlemen:

Enclosed are thirty-four (34) copies of Standard Safety Analysis Report (SSAR)/Tier 1 cross reference material for the ABWR. This material consists of tables which identify the relationship between SSAR safety analysis assumptions and the Inspections, Tests, Analyses and Acceptance Criteria (ITAAC) defined in the ABWR Design Certification Material submitted August 31, 1993 (Reference 1).

This submittal represents completion of the final element in the GE/NRC agreements on disposition of Roadmap-related issues as summarized in Reference 2. These GE and NRC agreements include the understanding that the attached material will not be included in either the SSAR or the Design Control Document (DCD). However, the attached information is consistent with SSAR Tables 14.3-1 through -3 and Tables 19.14-1 through -10.
