Washington, D.C. 20555

Dear Sir:

Subject: Oyster Creek Nuclear Generating Station (OCNGS)
Operating License No. DPR-16
Docket No. 50-219

Technical Specification Change Request (TSCR) No. 206
RE: Implementation of Programmatic Controls for Radiological
Effluent Technical Specifications (RETS) pursuant to
Generic Letter 89-01

Pursuant to 10 CFR 50.90, GPU Nuclear Corporation (GPUN), operator of the Oyster Creek Nuclear Generating Station (OCNGS), Operating License No. DPR-16, requests a change to the Appendix A of the license.

Also enclosed is one signed copy of the Certificate of Service for this request which confirms service to the senior official of the township in which the facility is located.

The proposed amendment deletes portions of the OCNGS Radiological Effluent Technical Specifications and relocates them to controlled programs in accordance with the guidance contained in NRC Generic Letter 89-01, dated January 31, 1989.

As discussed with Mr. A. Dromerick, Oyster Creek Project Manager, on June 21, 1993 by phone, GPUN plans to submit a separate TSCR to incorporate 10 CFR 20 changes into the Technical Specifications and ODCM upon receipt of the license amendment for TSCR No. 206. The additional TSCR will include proposed changes to those sections of RETS which remain in the Oyster Creek Technical Specifications. We are also aware that a Generic Letter is being prepared by the Staff to provide model Tech. Spec. wording for the Part 20 requirements. More importantly, however, are the Part 20 changes which become effective January 1, 1994 affecting the ODCM. Those Part 20 changes will require additional revisions to the current version of the ODCM being submitted with this TSCR. In order to facilitate this tight schedule, we request the Staff's review and approval of TSCR No. 206, as soon as practicable, but no later than November 30, 1993 if possible.

GPU Nuclear Corporation is a subsidiary of General Public Utilities Corporation

ADOCK 11

This change request has been reviewed in accordance with Section 6.5 of the OCNGS Technical Specifications. And using the standards in 10 CFR 50.92 we have concluded that these proposed changes do not constitute a significant hazards consideration.

Pursuant to 10 CFR 50.91 (b) (1), a copy of this change request has been sent to the State of New Jersey Department of Environmental Protection.

Sincerely,

for J. J. Barton
Vice President and Director
Oyster Creek
