Tennessee Valley Authority)		50-260
			50-296

In accordance with the provisions of 10 CFR Parts 50.59 and 50.90, we are enclosing 40 copies of a requested amendment to licenses DPR-33, DPR-52, and DPR-68 to change the technical specifications of Browns Ferry Nuclear Plant units 1, 2, and 3 (Enclosure 1). A description of the changes and reason and justification for each are also enclosed (Enclosure 2). These are administrative changes which serve only to update certain specifications and clarify requirements of others. These changes have no adverse impact on plant safety. We request approval of these proposed changes by October 16, 1982.

In accordance with the requirements of 10 CFR Part 170.22, we have determined this proposed amendment to be Class II for unit 1 and Class I for units 2 and 3. These classifications are based on the facts that the proposed amendment is an administrative change that has no safety significance for unit 1, and the proposed amendments for units 2 and 3 are duplicates of the unit 1 proposed amendment. The remittance for \$2,000 (\$1,200 for unit 1 and \$800 for units 2 and 3) is being wired to the NRC, Attention: Licensing Fee Management Branch.

Very truly yours,
