SUBJECT: James A. FitzPatrick Nuclear Power Plant  
Docket No. 50-333  
**Proposed Changes to the Technical Specifications  
Spent Fuel Pool Storage Capacity  
Replacement Section 6 (JPTS-89-035)**

Reference: 1. NYPA letter J.C. Brons to NRC, dated May 31, 1990 (JPN-90-043), "Proposed Changes to the Technical Specifications Regarding Spent Fuel Pool Storage Capacity (JPTS-89-035)."

Dear Sir:

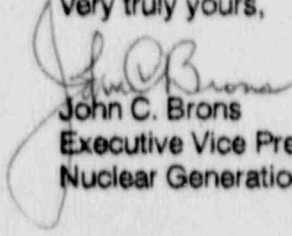

In Reference 1, the Authority submitted proposed changes to the FitzPatrick Technical Specifications to increase the maximum allowable number of spent fuel assemblies in the spent fuel pool. In that submittal several pages were inadvertently omitted from Section 6 of Attachment III to Reference 1, "Licensing Report for Increased Storage Capacity for the James A. FitzPatrick Spent Fuel Pool."

Attached is a replacement Section 6 and a new Table of Contents. These attachments replace the Section 6 and Table of Contents originally submitted in their entirety.
