Subject: 1989 Annual Radiological Environmental Operating Rep. c
Additions

There are certain sections in the 1989 Annual Environmental Radiological Report (Reference 2) that need to be revised. Pages 1 and 2 of the attachment list several additions to section 6.0 "Program Execution", section 6.1 "Thermoluminescent Dosimetry (TLD)", and section 6.3 "Other Deviations from Program". These additions report information on the handling of the sample media, e.g., TLD's, water and milk samples. This information was inadvertently omitted from Reference 2.

Map locations listed for tables 8.0-1 through 8.0-7 "Radiological Environmental Monitoring Program, Fermi 2 Sample Locations and Associated Media, Direct Radiation", are provided as pages 3 through 11 of the attachment. The cartography positions are revised to reflect more accurate locations based on improved methods of calculating this data. Also, certain information in the description column of these tables was incorrect and has been corrected. The last two pages of the attachment contain minor corrections for typographical errors.

If you have any question concerning these corrections please contact Mr. Joseph Pendergast, Compliance Engineer, at (313) 586-1682.

Sincerely,

Attachment
