

KANSAS GAS AND ELECTRIC COMPANY

GLENN L KOESTER
VICE PRESIDENT, NUCLEAR

August 5, 1982

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

KMLNRC 82-230
Re: Docket No. STN 50-482
Ref: Letter ULNRC-564 dated June 29, 1982 from
EKDille, UE, to HRDenton, NRC
Subj: Draft Technical Specifications

Dear Mr. Denton:

The referenced letter transmitted the draft Callaway Plant Technical Specifications. Due to the standardization of design between the Callaway and Wolf Creek Units, the two operating utilities jointly participated in the preparation of the draft Technical Specifications. In the interest of standardization and the review efficiency it affords, your staff in discussions with applicants agreed to perform a single review of all sections of the draft Technical Specifications common to both units.

Transmitted herewith are five copies of the Wolf Creek Generating Station, Unit No. 1, draft Technical Specifications material which is not common. These pages replace the identically numbered pages in the Callaway submittal. The unchanged pages from the Callaway submittal and the changed pages provided herewith thus make up the proposed Technical Specifications package applicable to Wolf Creek.

Yours very truly,

Glenn L Koester
