Docket No. 52-001

Document Control Desk
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. R. W. Borchardt, Director
Standardization Project Directorate

Subject: Submittal of ABWR Certified Design Material, 25A5447, Revision 2

Gentlemen:

Enclosed are twenty-two (22) copies of ABWR Certified Design Material, 25A5447, Revision 2. Please note that each copy consists of two volumes. This submittal contains no GE proprietary material.

This revision of 25A5447 contains relative few substantive technical changes. However, the title on each page has been changed from Design Certification Material to Certified Design Material. Because of this page title change, all of the pages in the existing document must be replaced with the attached revised pages. The existing divider tabs are still valid and should be retained.

Technical changes in this revision are a result of NRC reviewer comments on the earlier Revision 0 and Revision 1 versions of the document. These NRC comments were contained in:

- 1) Letter Boyce to Marriott, Docket 52-001, "Initial Comments on GE Advanced Boiling Water Reactor Certified Design Material," dated 9/27/93.
- 2) Letter Boyce to Marriott, Docket 52-001, "Comments on GE Advanced Boiling Water Reactor Certified Design Material," undated, but received by GE 11/9/93.
- 3) NRC ABWR ITAAC Independent Review Group comments received by GE 11/8/93.

This Certified Design Material revision also includes miscellaneous errata and addenda identified by GE. The cover page on Volume I of the attached summarizes those pages that have non-trivial technical changes. All changes (except for the page title item noted above) have a lefthand bar code identifier.
