Docket No. 50-334, License No. DPR-66  
Updated Inservice Testing (IST) Program

Gentlemen:

The purpose of this submittal is to provide the NRC with an informational copy of a revision to the Beaver Valley Unit No. 1 IST Program and to request approval of certain proposed changes.

Included with this submittal is Enclosure 1 which contains the Unit No. 1 Program currently in use. Attachments 1 and 2 of Enclosure 1 contain a summary of the program changes which have been incorporated into Revision 6. We have determined that these changes do not require prior NRC approval since all changes were either editorial in nature or are in compliance with the 1983 edition through the summer 1983 addenda of ASME XI or the positions delineated in Attachment 1 of Generic Letter 89-04.

Included as Enclosure 2 are proposed changes to the Unit No. 1 IST program which require prior NRC approval. These are submitted as marked up pages to facilitate NRC review. This enclosure is labeled Proposed Revision 1A. Attachment 1 of Enclosure 2 contains a summary of the specific changes in Proposed Revision 1A. It is requested that the NRC review these items on a schedule which would support implementation before the eighth refueling outage tentatively scheduled to begin April 12, 1991.

Future changes to the Unit No. 1 Program requiring prior NRC approval will be labeled "Proposed Revision 1 \_\_\_\_", and lettered sequentially according to the last revision formally submitted to the NRC for review and approval. Upon NRC approval, these proposed changes will be formally issued as an additional revision to the Unit No. 1 IST Program.
