)

Docket Nos. 50-327
50-328

SEQUOYAH NUCLEAR PLANT (SQN) - TECHNICAL SPECIFICATION (TS) CHANGE 93-16,
"REVISION OF ADMINISTRATIVE CONTROLS IN SECTION 6.0 OF TS AND THE
OPERATING LICENSE"

In accordance with 10 CFR 50.90, we are enclosing a requested amendment to Licenses DPR-77 and DPR-79 to change the TSs of SQN Units 1 and 2. The proposed change revises various portions within Section 6.0, "Administrative Controls," of the TSs. In addition, changes to the operating license, index, and definitions have been incorporated to support these revisions to the administrative controls. These changes involve revisions to the approval authority for exceeding overtime guidelines, titles for the Plant Operations Review Committee, requirements for the Radiological Assessment Review Committee, implementation of the Offsite Dose Calculation Manual, Quality Assurance Program procedures for environmental monitoring, condenser in-leakage monitoring requirements for the Secondary Water Chemistry Program, and position titles and references.

The proposed TS change is identified in Enclosure 1. The TS pages impacted by previously submitted TS Change 93-06 dated June 16, 1993, have been noted indicating the affected text. The justification for the proposed TS change is provided in Enclosure 2. A proposed determination of no significant hazards consideration performed pursuant to 10 CFR 50.92 is provided in Enclosure 3.

TVA requests a 45-day implementation period for this TS change following issuance.
