Docket No. 52-002

Attn: Document Control Desk  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: System 80+<sup>TM</sup> Information for Issue Closure

Dear Sirs:

The attachments to this letter provide material to close follow-on questions to DSER responses. Attachment 1 provides revision 2 of the System 80+ Human Factors Program Plan. Attachment 2 provides the Operational Support Information Program description. These attachments have been discussed with Mr. G. West.

Attachment 3 transmits ABB-CE's recommendations on equipment qualification as impacted by the implementation of the new source term technology. These recommendations have been discussed previously with Mr. J. Lee.

Attachment 4 presents the revised draft of the report on Severe Accident Mitigation Design Alternatives, as discussed at the September 2 PRA meeting and subsequent telephone calls. Copies should be provided to Mr. M. Franovich and Mr. R. Palla. Please note that this report will be finalized when all issues are resolved with NRC reviewers. The previous version of this report was printed in Appendix 19A, however, it is expected that final results will be presented in summary form in Appendix 19A and that the complete final report will be provided in a separate document.

Attachment 5 provides copies of three axes dated August 26, September 23, and September 24 which contain responses to PRA questions.
